

## NZSVET Newsletters | March 2026

Water Safety Awareness with Drowning Prevention Auckland

In March, our students took part in a water safety session delivered by Drowning Prevention Auckland.

The session introduced key ideas around staying safe in and around water, including risk awareness and basic safety practices—especially relevant in a country like New Zealand, where water activities are a big part of everyday life.

It was a useful opportunity for students to build awareness and confidence, particularly for those who are new to local environments.

At NZSVET, we're pleased to support initiatives like this that help our students stay safe beyond the classroom.

## Now Enrolling: Healthcare Level 3 – April Intake Starting Soon!

Exciting things are on the horizon at NZSVET as we prepare to welcome a brand-new cohort into our New Zealand Certificate in Health and Wellbeing (Level 3) (Healthcare Assistance), with classes starting on 7 April.

This highly practical programme is designed for students who are passionate about making a difference in people's lives and are looking to begin a rewarding career in the healthcare sector. With a strong focus on person-centred care, students develop the skills and confidence needed to support individuals with diverse and complex needs in real-world settings.

Throughout the 23-week programme, learners will explore key areas such as safe care practices, professional conduct, and effective communication—essential skills for working in aged care, community support, and healthcare environments.

What makes this programme truly stand out is its hands-on workplace experience, where students complete 115 hours of practical placement, gaining invaluable industry exposure and building job-ready skills.

Graduates of this programme can progress into roles such as Healthcare Assistant, Community Support Worker, or continue their studies at Level 4 to further advance their careers.

As we count down to the April intake, our team is busy preparing to support and guide our new students on their journey into this meaningful and high-demand field.

Interested in joining? Applications are still open—now is the perfect time to take the first step towards a career in healthcare.

## April: Welcome Our Japanese Visitors!

### Global Connections: Preparing to Welcome Our Japanese Visitors!

As we wrap up March, there is a real buzz of anticipation in the air at NZSVET. We are putting the final touches on a very special programme as we prepare to welcome a group of students from Japan for an 11-day cultural and educational exchange this coming April.

Our team has been busy designing a world-class Kiwi experience that balances academic growth with the very best of Auckland's sights. Here's a sneak peek at what we have lined up for our guests:

- **Immersive Learning:** Students will join us on campus for intensive, tailored English classes designed to build confidence and strengthen communication skills in a vocational context.
- **Cultural Exploration:** Beyond the classroom, we've curated a "Best of Auckland" itinerary, including guided visits to the Auckland Museum, the University of Auckland, and Auckland Art Gallery Toi o Tāmaki.

- **Iconic Views:** No trip to the City of Sails would be complete without a visit to Maungawhau (Mt Eden), where students can take in the volcanic landscape and explore the surrounding village.

International exchanges like these are at the heart of the NZSVET spirit—fostering global connections and broadening the horizons of both our visitors and our local students.

Keep an eye out for our April update, where we'll share photos and stories from their journey!
