Mental Health Awareness Workshop

In May, our New Zealand Certificate in Health and Wellbeing (Level 3) (Healthcare Assistance) students had the opportunity to attend a very special workshop delivered by the team at Comprehensive Care.

Held on Thursday 28 May, the session introduced students to mental health support services and the facilities available in our community — and it did so from two equally important angles.

For students who may one day need these services themselves, it was a chance to understand what support looks like and to feel more confident reaching out. For those stepping into their roles as Healthcare Assistants, it was an invaluable insight into what facilities and pathways are available — so they can guide the people in their care with knowledge and compassion.

It was exactly the kind of learning that goes beyond the textbook: practical, human, and deeply relevant to the work our students are preparing for.

A big thank you to Amber and the Comprehensive Care team for making the time and delivering such a meaningful session for our whānau.

English Micro-Credential – Learning Beyond the Classroom

Our English Micro-Credential students traded the classroom for one of Auckland's most treasured landmarks — a visit to the Auckland Museum Tāmaki Paenga Hira!

It was a day filled with discovery. Students explored the rich world of Māori culture and history, took in the stories of New Zealand's past, and encountered the incredible flora and fauna that make this country so unique. There is something special about standing in front of the real thing — it brings language and learning to life in a way no classroom wall ever could. The students threw themselves into the experience wholeheartedly, and the energy and joy they brought to the day was wonderful to see. Trips like these are a reminder of why we love learning beyond the classroom. When language meets real-world discovery, something truly clicks — and our students proved that beautifully.
